Discourse Analysis in Translation Studies - Jeremy Munday 2017-07-18 Discourse analytic approaches are central to translator training and translation analysis, but have been somewhat overlooked in recent translation studies. This volume sets out to rectify this marginalisation. It considers the evolution of the use of discourse analysis in translation studies, presents current research from two leading figures in the field and provides pointers for the future. Topics range from close textual analysis of cohesion, thematic structure and the interpersonal function to the effects of global English and the discourses of cyberspace. The inherent link between discourse and the construction of power is evident in many contributions that analyse institutional power and the linguistic resources which mark translator/interpreter positioning. An array of scenarios and languages are covered, including Arabic, Chinese, English, German, Korean and Spanish. Originally published as a special issue of Target 27:3 (2015).

Eichmann in Jerusalem - Hannah Arendt 2006-09-22 The controversial journalistic analysis of the mentality that fostered the Holocaust, from the author of The Origins of Totalitarianism Sparking a flurry of heated debate, Hannah Arendt’s authoritative and stunning report on the trial of German Nazi leader Adolf Eichmann first appeared as a series of articles in The New Yorker in 1963. This revised edition includes material that came to light after the trial, as well as Arendt’s postscript directly addressing the controversy that arose over her account. A major journalistic triumph by an intellectual of singular influence, Eichmann in Jerusalem is an unflinching look at one of the most unsettling (and unsettled) issues of the twentieth century.
